AKIMBO CREATIONS ANNOUNCES ARC CONTINUUM: AN OFFWORLD TIME-BENDING SPACE ADVENTURE

An epic single and multiplayer action adventure game that allows gamers to explore stunning galactic realms as a reformed galactic bounty hunter

Travel to parallel universes, solve ancient alien puzzles and master fantastic time-shifting powers.

Vote Now on Steam Greenlight and bring this epic saga to life

VANCOUVER, BC – Sept 4th, 2015: Independent videogame studio Akimbo Creations today announced the global launch of its flagship action-adventure ‘ARC Continuum’ onto Steam Greenlight. ARC Continuum sets players in a desperate race against time to rescue an entire alien species from obliteration.

About the Game

ARC Continuum is a riveting 3rd person, action adventure experience where you assume the role of a galactic bounty hunter turned freedom fighter. Players will begin their story marooned on the hopelessly oppressed desert planet of Taraan. Home to an ancient underground city, your journey puts you on a collision course with the ARC, an extraordinary device that enables it’s wearer to control time itself.

Filled with tense combat, rich environments and lethal puzzles to be solved, ARC Continuum delivers a compelling hybrid of single player and multiplayer gameplay that brings a compelling new twist to the sci-fi genre.

Steam Greenlight & Launch Details:
