AKIMBO CREATIONS OFFICIALLY OPENS IT'S DOORS IN VANCOUVER, CANADA

*New technology startup promises to shake up the world of interactive content creation
and innovation*

Vancouver, BC – Mar 2, 2015: Akimbo Creations today announced its launch as an independent videogame and networking technology studio, developing an action adventure game 'ARC Continuum' in tandem with a revolutionary peer-to-peer networking middleware platform.

This dynamic new startup has been founded by Behrouz Poustchi, a veteran entrepreneur spanning multiple industries throughout Canada and Asia Pacific.

"It's incredible to see how deep and diverse the local talent pool has become," said Behrouz Poustchi, CEO of Akimbo Creations. "With a massive international profile and longstanding connections with the gaming and technology sectors worldwide, Vancouver was the logical choice for our headquarters."

Akimbo Creations is dedicated to creating immersive digital entertainment that pushes the limits of game technology and delivering high quality multiplayer games that uses their innovative, fault tolerant peer-to-peer networking technology.

Key to the future plans of Akimbo is the development and commercial launch of their proprietary networking solution. *"Our super-talented team are currently developing an entirely new peer-to-peer networking middleware platform that will revolutionize the way multiplayer networking functions in the gaming industry,"* said Behrouz Poustchi.

The new networking middleware will be debuted in the sci-fi action adventure game 'ARC Continuum', an epic single and multiplayer PC game that allows gamers to explore constantly shifting multiverses where events can play out in an infinite variety of ways.
